

The project Intercepted contributes to develop the European Virtual Judicial and Security Academy

a training place where the boundaries of geography and language disappear, where judges, prosecutors, lawyers, and legal professionals from across Europe—and beyond—can gather in a shared virtual space to learn, exchange, and grow together on how to prevent and combat trafficking on human beings and the related crimes.

The Intercepted training course covers the following areas

The Academy is a dynamic, immersive virtual environment like no other, where legal and security practitioners and vetted NGOs can navigate a richly detailed space designed not only for learning, but for meaningful interaction and, in the secure area, for operative analysis

The technical training materials and solutions articulated in 5 modules can be used directly by learners in an asynchronous format, or by trainers in a synchronous format—either in a blended mode (i.e., a mix of classroom and online lessons) or as support tools for in-person training. Please contact our office responsible for combating Human Trafficking if you wish to organize customized courses.

Combating trafficking on human beings

Our correspondent Fausto Biloslavo followed groups of migrants along the Balkan route. This video helps to understand some aspects of the illegal migration mechanism. We kindly ask you to watch it to gain a more accurate understanding of the reality of this phenomenon

The Intercepted project has analyzed numerous cases of human trafficking on an international scale. We invite you to read this document to gain a comprehensive understanding of the complexity of this phenomenon in its various facets

Guided Exercise of a transnational investigation on THB

This exercise is a training tool designed to explore various aspects of a transnational human trafficking investigation, based on a real but anonymized case. The core of the case focuses on the collection of digital evidence. The exercise can be carried out in groups or individually, but should always be guided by an experienced trainer who can highlight the elements of police cooperation and judicial cooperation involved in the acquisition of digital evidence, as well as the appropriate choice of forensic tools both for searches and for the investigation as a whole.
